| Set | Quantity of Licenses | Date Expired | License Set* |
|--------------|----------------------|------------------|--------------|
| A | 5 | May 5, 2023 | 3AT-UUK-xxx |
| B | 13 | May 5, 2023 | 3AT-UU4-xxx |
| C | 9 | October 16, 2024 | 3AP-63T-xxx |
| D | 27 | April 15, 2025 | 3AS-7C9-xxx |
| E | 37 | April 15, 2025 | 3AS-7DF-xxx |
| F | 247 | May 5, 2025 | 3AE-G2X-xxx |
| TOTAL | 338 | | |

* The complete license set is not given since this is considered confidential data. The complete license set will be revealed to the winning bidder upon signing of the Non-Disclosure Contract.

DELIVERABLES:

| Lot | Quantity | Description |
|-----|----------|--|
| 1 | 338 | <p>Divided into 6 license sets i.e.</p> <ul style="list-style-type: none">• Set A – 5 licenses• Set B – 13 licenses• Set C – 9 licenses• Set D – 27 licenses• Set E – 37 licenses• Set F – 247 licenses <p>Totalling to 338 licenses issued in 6 license sets</p> |

TECHNICAL SPECIFICATIONS FOR THE RENEWAL OF THE EXISTING ENDPOINT ANTIVIRUS SECURITY

| Particulars | Specifications |
|--|--|
| Endpoint Antivirus Security– Branded and complies with the following minimum requirements: | |
| Quantity: | 338 licenses issued in 6 license sets i.e., Set A – 5 licenses Set B – 13 licenses Set C – 9 licenses Set D – 27 licenses Set E – 37 licenses Set F – 247 licenses |
| Delivery Period: | Within 7 days upon receipt of Notice to Proceed (NTP) |
| Features: | <p>Must be a multi-layered protection for the agency</p> <p>Must protect the agency's computers, laptops and workstations with cutting-edge security products all managed via management console</p> <p>Must have a single-pane-of-glass remote management for visibility to threats, users and quarantined items.</p> <p>Protection via advanced multi-layered technology including file server security with secured intranet</p> <p>Must provide multiple layers of protection and can detect malware before, during, and after execution</p> <p>Must have machine learning, advanced behavioural analytics, big data and human expertise work in dynamic equilibrium to balance performance, detection and false positives</p> <p>Must be capable to protect against ransomware</p> <p>Must block targeted attacks</p> <p>Must prevent data breaches</p> <p>Must stop fileless attacks</p> <p>Must detect advanced persistent threats</p> <p>Must be an existing brand for more than 30 years in the market</p> <p>Must be capable of antivirus and antispyware which eliminates all types of threats, including viruses, rootkits, worms, and spyware</p> |

| Particulars | Specifications |
|-------------------|--|
| Features: (cont.) | Must be capable of whitelisting of safe files based on file reputation database for better detection and faster scanning |
| | Must be capable of virtualization support which can store metadata about scanned files within the virtual environment so identical files will not be scanned again which results in boosted scan speed |
| | Must be capable of Host-Based Intrusion Prevention System (HIPS) which enables the user to define rules for system registry, processes, applications and files and also provides anti-tamper protection and detect threats based on system behaviour |
| | Must be capable of exploit blocker which strengthens security of workstation applications such as web browsers, PDF readers, email clients of MS Office components. |
| | Must be capable to monitor processes behaviours and look for suspicious activities typical of exploits |
| | Must be capable to strengthen protection against targeted attacks and previously unknown exploits such as zero-day attacks |
| | Must be capable of advanced memory scanner which monitors the behaviour of malicious processes and scans them once it de-cloak in the memory which allows for effective infection prevention even from heavily obfuscated malware |
| | Must be capable of client antispam which effectively filters out spam and scans all incoming emails for malware |
| | Must have cross-platform protection which are capable of detecting threats for Windows and Mac OS resulting to delivering better protection in multi-platform environments |

| Particulars | Specifications |
|-------------------------|--|
| Features: (cont.) | Must be capable of web control which can limit website access by category such as gaming, social networking, shopping and etc. |
| | Must have anti-phishing which protects end users from attempts by fake website to acquire sensitive information such as usernames, passwords and other sensitive information |
| | Must have a vulnerability shield which improves detection of common vulnerabilities and exposures on widely used protocols such as SMB, RPC and RDP that results to protection against vulnerabilities for which a patch has not yet been released or deployed |
| | Must be capable of botnet protection which protects against infiltration by botnet malware that can prevent spam and network attacks launched from the endpoint |
| | Must have a device control which blocks unauthorized devices from the system such as USBs and alike |
| Subscription: | Three (3) years subscription |
| Bidder's Qualification: | Bidder must be a manufacturer authorized reseller of the brand they are offering |
| | Bidder must have employed with at least two (2) certified technical engineers of the brand they are offering |
| Services: | Bidder must be able to renew the existing antivirus remotely even when the workstations are deployed nationwide |
| | Live web chat, email, online help or onsite visit if necessary |
| | Bidder is required to integrate the antivirus license to the existing management console |
| | Licenses and subscriptions are expected to start upon installation |

| Particulars | Specifications |
|-------------------|---|
| Services: (cont.) | Provide unlimited support knowledge base access |
| | Provide unlimited software downloads, updates and maintenance |
| | Provide unlimited access to support forums |
| | Three (3) years 24/7 support |
